

LIGHTING AMNESTY

SCRAP AND SAVE

CASH BACK FOR INSTALLERS • ENERGY SAVINGS FOR END USERS

The Lighting Amnesty is an incentivised scheme to encourage the switch from old wasteful lighting, to new low energy LED lighting - available in Infra-Red and White-Light. The new scrap-and-save scheme offers installers cash back to make the switch and helps end users to significantly reduce power consumption, CO2 emissions and running costs.

3 Steps to Scrap and Save

1...

Identify OLD wasteful lighting technology

2...

Receive FREE site survey and energy saving report

3...

Switch to NEW energy saving LED technology. Claim cash back - deliver cost savings

How to claim...

- Call Raytec to log your details and book a site survey: +44 (0) 1670 5200 55.
- Once the survey has been completed, Raytec will send you a detailed report highlighting the potential CO2, energy and cost savings of the project.
- When placing your order with your distributor, quote your unique reference number provided in your energy report.
- Your distributor will fax a confirmation to Raytec including your unique reference number.
- Raytec will send your cash back by cheque directly to you.
- For full terms and conditions please call Raytec on +44 (0)1670 52 00 55 (or see below)

LIGHTING AMNESTY CASH BACK RAYMAX Infra-Red & RAYLUX White-Light Low Energy LED Illuminators *

RM/RL 300	£20 per unit
RM/RL 200	£15 per unit
RM 150/100	£10 per unit
RL 150/100	£5 per unit

*RM/RL 50 & 25 not included in the Lighting Amnesty cash back scheme

Low energy LED illuminators deliver lower power consumption, lower running costs, zero maintenance and provide longer life compared to older style lighting which can also be extremely slow to start up.

“When you switch to low energy LED illuminators delivering low running costs and long life, an organisation such as a hospital, using 100 CCTV and security lights could be saving £46,000 per year”

In switching to LED illuminators the user will start to make overall cost savings within 2 years compared to 500W lights and in 3 years compared to 300W lights.

OPERATIONAL COST PER YEAR				
	Mains Driven Bulb	Low Voltage Halogen Bulb	LED RAYMAX & RAYLUX	Raytec Saving
10 units	£4,960	£2,380	£360	£4,600
50 units	£24,800	£11,900	£1,800	£23,000
100 units	£49,600	£23,800	£3,600	£46,000

CO2 & LABOUR SAVINGS (Example 100 Raytec LED lights over 10 years)	
Total Cost Saving	£460,000
Labour Savings	2,400 fewer bulb changes
CO2 Emissions Reduction	800,000 kg of CO2

This estimate is based upon 4,400 hours usage per year at 10p kw/hr; with labour costs conservatively calculated at £40 per bulb change (though it is often much higher), based on 2.4 bulb changes per year.

COST SAVINGS SUMMARY POSSIBLE BY SWITCHING TO RAYTEC ILLUMINATORS

- Potential saving on 1 illuminator of £460 per year
- Over ten years this is a potential saving of £4,600 for 1 illuminator
- Potential saving on 100 illuminators of £46,000 per year
- Over ten years this is a potential saving of £460,000 for 100 illuminators

Remember: LED's also provide increased site security!

Terms and conditions: Customer must be switching a site from old bulb based technology to new Raytec LED lighting. A site survey which will provide a unique reference number is needed to claim under the Lighting Amnesty scheme. To qualify, the project must be logged with Raytec between October 1st, and March 31st. Cash back will be honored should the project be completed after the Lighting Amnesty period ends. UK projects only. International projects can be considered case by case. Cash back will be awarded to installers only and is dependent on unit size and quantity (see cash back table above). Cash back is limited to £1,000 per site. The cash back cannot be exchanged for discount, be negotiated or be used on existing orders before the Lighting Amnesty period.
